Practical Work

Program 1 – Multiplication Table

Ask the user for a number.

Display its multiplication table from 1 to 10.

Example:

```
7 × 1 = 7
7 × 2 = 14
...
7 × 10 = 70
```

Program 2 – Student List

Create a list of student names.

Display all students using a loop.

Example:

```
Students
```

```
John
```

```
Rahim
```

```
Aisha
```

```
David
```

Program 3 – Number Guessing Game

Generate a random number between 1 and 20.

Keep asking the user to guess until they get the correct answer.

Display messages like:

Too High

Too Low

Correct!
